THEATRE ON ICE TEAM SKATING

Definition - A Theater on Ice (TOI) performance is a creation using all aspects of figure skating, incorporating a theme, emotion or story, enhanced by music. It is a Package that includes five dimensions: choreography, skating movements and rapport between the skaters and/or sub-groups of skaters, props or scenery, sound, and theme. The quality of edge, speed, ease and fullness of movements should enhance the performance. It should also incorporate movement of groups and a variety of skating elements. The performance will be evaluated on its relationship between music, theme and overall skating.

Teams - The teams will be composed of a minimum of eight (8) skaters and a maximum of thirty (30) skaters.

Requirements - Test rules for US teams are in the process of changing. With the publication of the [2008 TOI rules](#), new testing requirements were instituted and will be in place for this competition. All members of a US TOI team must be members of the USFSA, either through an existing Member Club or as an Individual Member of the Association. In addition, each team must be registered as a TOI team (see USFSA Rulebook MR 12.00).

Performance - The performance should express a theme, emotion or story. The music, costumes, scenery, as well as the choreography should be used to enhance the theme. Jumps and other figure skating elements should contribute to the choreography and support it. They must have meaning within the theme. There is no limit to the number of jumps that may be done. Jumps, however, must have a meaning in relation to the theme and should not be gratuitous. Solos or pairs also must have meaning within the theme. They can not be a dominant part of the performance. Soloing should not exceed 30 seconds of the performance. The choreography should emphasize and support gliding. Stationary positions should be limited and excessive use will be reflected in the marking accordingly. Skaters are permitted to leave the visible portion of the ice, such as behind the flats or a piece of scenery. All participants must wear their skates on the ice.

Costuming - Costumes must be decent. Hair and ornaments must be secure. Costuming and makeup should enhance the feeling created by the performance.

Scenery – Scenery may be used but cannot be more than 6 feet in height once in place on the ice. All scenery must be placed on the ice and taken off the ice by the skaters and teams may not use the assistance of support staff (e.g., parents, coaches, others who are not skating in the number) to place the scenery on the ice or move it into position. Throwing of objects on the ice (including hats, canes, etc.), smoke, fire, liquids, released balloons or live animals are not permitted.

Timing for Scenery Set-up and Scenery Breakdown – Scenery set-up and warm-up must be completed within 2 minutes of the team being announced (timing begins from the moment the team is announced). The referee will signal a warning at 1 minute 30 seconds into this 2 minute period. The team should be in its starting position by the end of the 2 minute period. Once the 2 minute mark has passed, if the team is not in position and ready to start, the referee will start the clock for the team's program time without further warning to the team. Likewise, at the end of the program the team has a maximum of 2 minutes to take their bows and remove all scenery/items from the ice surface. If the teams have not removed all scenery to the satisfaction of the referee within the 2 minute allotment, a deduction of 0.1 from each mark will be taken.

Warm-up – No specific warm-up time is permitted. However, the teams may use all or part of the two-minute set-up time after their name is announced for warm-up.

Lighting – Standard rink lighting will be used for all events. No spotlights or special lighting will be used.
